

Michael Smith

Email: michael.smith@email.com

Phone: +1-555-987-6543

Location: New York, USA

PROFESSIONAL SUMMARY

Data Scientist with experience in machine learning, deep learning, NLP, and data analysis. Skilled in Python, SQL, Scikit-learn, Pandas, NumPy, AWS, Docker, and FastAPI. Experienced in building predictive models and deploying machine learning applications.

SKILLS

Python, SQL, Machine Learning, Deep Learning, Natural Language Processing, Pandas, NumPy, Scikit-learn, AWS, Docker, FastAPI, Git, MLflow, Data Visualization

EXPERIENCE

Junior Data Scientist | XYZ Analytics (2024 – Present)

- Built machine learning models for customer churn prediction.
- Developed NLP pipelines for text classification.
- Created REST APIs using FastAPI.
- Deployed models using Docker and AWS.
- Performed exploratory data analysis using Pandas and NumPy.

PROJECTS

Resume Screening System

- Built an NLP-based resume screening application.
- Used TF-IDF and Scikit-learn for classification.
- Developed web interface using FastAPI.

Customer Churn Prediction

- Built classification models using Machine Learning.
- Improved prediction accuracy through feature engineering.

EDUCATION

Bachelor of Technology in Computer Science

ABC University (2020 – 2024)
